Department of Geology, TSU Faculty of Exact and natural sciences, University St. N2 11th building of TSU

In 2017 from 5th to 21st October in the territory of Village Udabno we went on an expedition, which was led by Maia Bukhsianidze.

During the expedition we collected fossils, created database and Lithostratigraphic column.

At the conference we will share the review of lithostratigraphic column, describe found fossil fauna of this site.

We will also talk about the future perspectives of Udabno's site.
